

METALLI PER LEGHE

METAL ALLOYS / MÉTAUX POUR ALLIAGES

Rame elettrolitico (99,9%) per leghe oro giallo
Electrolytics copper (99,9%) for yellow gold alloys
Cuivre électrolytique (99,9%) pour alliage or jaune

0149/1 | **in gocce / in drops / en gouttes**

0149/3 | **ø 2,5 x 10 mm (Oxygen Free)**

0149A | **Ottone in gocce per leghe oro giallo**

Brass in drops for yellow gold alloys
Laiton électrolytique en gouttes pour alliage or jaune

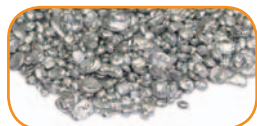

0149/5 | **Similoro in gocce (confezione da 1 kg)**

Tombak in beads (1 kg pack)
Similor en goutte (paquet 1 kg)

B183N | **Lega per fusione, oro giallo.**
Durezza 130/250 HV. 750‰

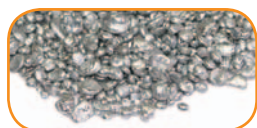

Casting alloy, yellow gold.
Hardness 130/250 HV. 750‰

Zinco elettrolitico (99,9%)
Electrolytic zinc (99,9%) / zinc électrolytique (99,9%)

0153 | **In gocce (esente Arsenico)**

In drops (Arsenic-free)
En gouttes (sans Arsenic)

NI 1811-01 | **Lega per fusione, oro bianco.**
Durezza 180/280 HV

Casting alloy, white gold. Hardness 180/280 HV

S925CZ | **Lega argento, adatta a microfusione con pietre sensibili alla temperatura.**
Alta fluidità a basse temperature di processo. Durezza 55/115 HV. 925‰

Silver alloy, suitable for stone-in-place casting with temperature sensitive stones. High fluidity at low processing temperatures. Hardness 55/115 HV. 925‰

NI 1811-03 | **Lega Nickel-safe, adatta alla microfusione con pietre in sistemi chiusi**

Nickel-safe alloy, suitable for stone-in-place casting in closed system

METALLI PER LEGHE

METAL ALLOYS

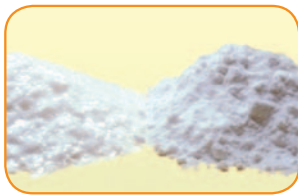

MÉTAUX POUR ALLIAGES

0140	Fondente "DIMAICA" per limature e pulimenti
-------------	--

"DIMAICA" flux for filing or polishing

Fondant "DIMAICA" pour limaille

Acido borico / boric acid / acide borique

0141/010	in polvere / powder / poudre	(1kg)
-----------------	-------------------------------------	--------------

0141/050	in polvere / powder / poudre	(5kg)
-----------------	-------------------------------------	--------------

0141/1	in polvere / powder / poudre	(25kg)
---------------	-------------------------------------	---------------

0142/010	in scaglie / in flakes / en écailles	(1kg)
-----------------	---	--------------

0142/050	in scaglie / in flakes / en écailles	(5kg)
-----------------	---	--------------

0142/1	in scaglie / in flakes / en écailles	(25kg)
---------------	---	---------------

Borace / borace / borax

0143/010	in polvere / powder / poudre	(1kg)
-----------------	-------------------------------------	--------------

0143/050	in polvere / powder / poudre	(5kg)
-----------------	-------------------------------------	--------------

0143/1	in polvere / powder / poudre	(25kg)
---------------	-------------------------------------	---------------

0145	Salnitro in polvere per purificare l'oro
-------------	---

Potassium nitrate for gold purify

Poudre de salpêtre pour purifier l'or
